

Invitation to TAC Challenge 2024

Where concept meets reality

We welcome you to the 4th annual TAC Challenge: an international subsea drone competition for high school and university teams.

The competition connects new technology concepts with reality.

Challenges in the competition are designed by leading industry partners and the students will work in teams to solve real-world problems.

The student teams participate with self developed drones and will compete in various underwater challenges.

TAC Challenge is a unique arena for connecting students and businesses with the purpose of finding scalable solutions for the energy and offshore industry.

TAC Challenge 2024

- Location: Stavanger, Norway
- Dates: TBA, Summer 2024
- Hosted by: TAC
(Tau Autonomy Center)

The purpose of the competition:

- Connecting the world's best STEM students with leading industry businesses
- Leverage global academic and professional networks
- Discover inventive ways to use autonomous aerial and subsea drones
